TECO NEWS

Wheel aligner 3D TECO920

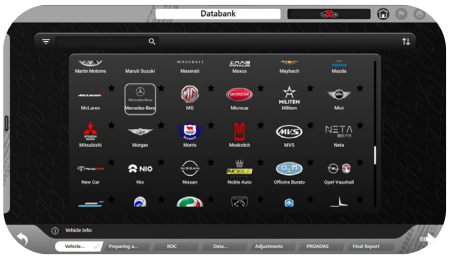

N. 24 B 30/10/2026

Teco920: range has been renewed with the launch of the new software.
Starting in June, the Teco920 product will be renewed with the introduction of the new version, featuring fully updated software. This is not just an appearance upgrade: the core transformation lies in the software itself, which has been designed to streamline workshop operations, enhancing efficiency and productivity.

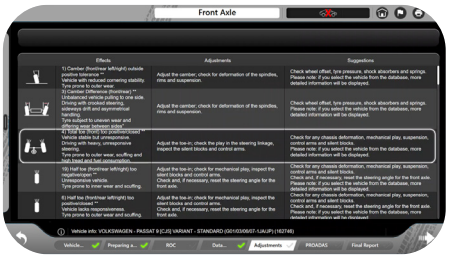

Changes, in practice

- **New, modern and professional graphic** interface.
- **Enhanced user-friendly navigation,** with new vertical menu and quick-access icons.
- **Enhanced wizards,** designed for less experienced operators in mind.
- **Greater data visibility** during alignment operations.
- **Smoother workflow,** thanks to the progress bar and simplified operational logic

N. 24 B

30/10/2026

Main features

All the platform's core strengths remain unchanged:

- High measuring precision (up to 0.01°);
- High-resolution 2-camera technology;
- Extensive vehicle database (covering over 84,000 models);
- Compatibility with PROADAS system;
- Proven operational reliability in the field.

Update for installed machines

For machines already installed and equipped with the previous software, customers can purchase the software upgrade kit, which allows the system to be upgraded to the new software environment already available on newly manufactured machines. The upgrade is available in two options:

- **Upgrade with SMART-UPDATE service**: code **8-33100222**
- **Upgrade with traditional kit**: code **8-34100057**

Both options include the vehicle database update to the 2026 version. For machines with the U.S.A. database enabled, this database is also updated to the 2026 version. Existing installations are thus brought up to the same level of performance and usability as the new version.

Why this update really matters

In the workshop, time is of the essence. clearer and faster software involves:

- reduced unnecessary steps;
- fewer errors;
- increased productivity

For product codes and a complete list of available accessories, please refer to the catalogue
