

Dear Sirs, Madams,

We are pleased to announce the launch of the new **STEPLINE 6400**, expanding the Teco range dedicated to digital wheel balancers.

The **STEPLINE 6400** is designed for workshops and tyre specialists looking for a simple, reliable and immediate solution, featuring a **digital display integrated into the weight tray cover** and a practical, well-organised workstation.

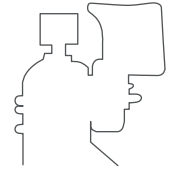

Ideal for bench balancing of **passenger car, light commercial vehicle and motorcycle wheels**, it provides everything needed to efficiently handle daily operations.

A solid, efficient and practical solution, capable of ensuring **operating speed, ease of use and consistent results**.

► Main features

- Integrated digital display and organised work area
- Intelligent 26" measuring arm
- 44" wheel guard
- Professional programs including: ALU, ALU P, ALU MOTO, DYN, DYN MOTO, STATIC MOTO, HIDDEN WEIGHT, SPLIT WEIGHT, OPT and MULTIOPERATOR

► Available options

Optional accessories include the **Laser & LED Assistance kit**, the **rim width measuring device** and the **foot-operated brake**. Versions are usually supplied with a **wheel protection guard**. A version without guard is also available where permitted.
