

OGGETTO: Teco 804 Special SMART new CCD wheel aligners

We are proud to announce that our range of CCD wheel aligners has been expanded with the new **Teco 804 Special Smart**

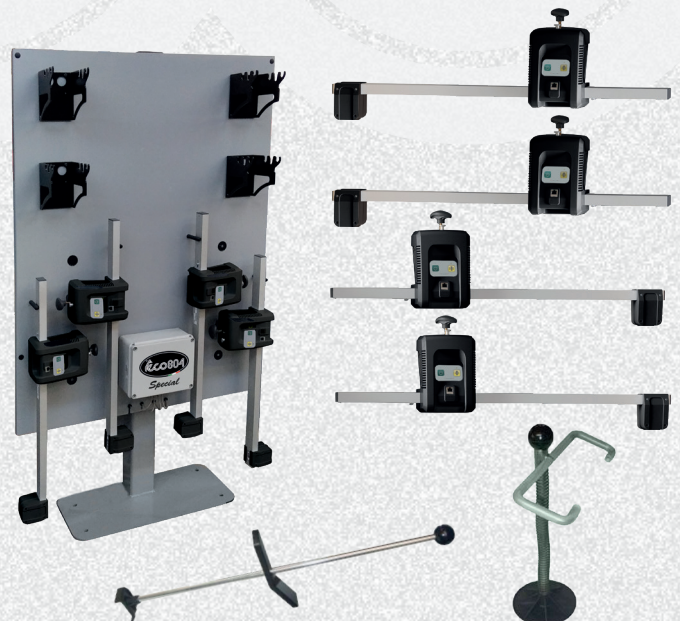

Key features

- Professional and compact 8-sensor wheel aligner, also well suited for small size workshops.
- Designed for cars and light duty vehicles.
- Compatible with the Proadas technology.

804 Special Smart includes:

- Docking station with charging supports, charger and clamps. Floor or wall mounting installation.
- 4 wireless sensor heads with batteries and charging system on the docking station.
- Alignment software and user manual.
- Radio module for central unit and hardlock.
- Steering lock and pedal pressing device.

Recommended accessories:

- A variety of self-centring, fast or ROC skip clamps.
- A standard or rugged laptop with Multi Language Windows 10 IoT operating system.
- Inkjet printer.
- Printer stand.

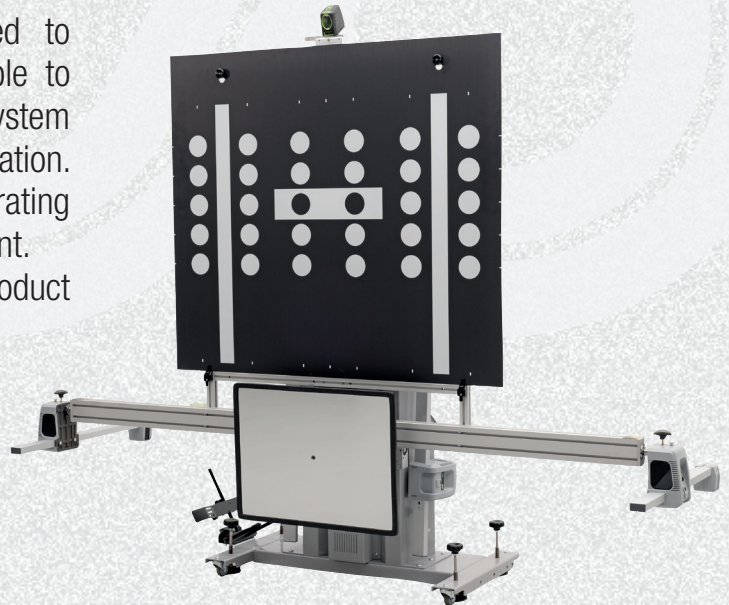

Wheel aligner software

Runout compensation when pushed or wheels up, database with over 40,000 vehicles, adjustment pages with animated cursors and coloured markings to work at a distance, printout with graphics. Live caster and kingpin inclination measurement and adjustment (KPI).

With the alignment sensors fitted to the PROADAS system, it is possible to accurately and quickly align the system for on-board camera and radar calibration. Manufacturers recommend calibrating ADAS systems after vehicle alignment. Find out more in the PROADAS product area on our website.

Please review our product brochure for any further technical details on the new aligner and its accessories.
