

SUBJECT: TECO58M - New semi-automatic truck tire changer

We are pleased to present you our new model **Teco58M**: a **semi-automatic** truck tire changer for truck, bus, tractor and earthmoving machines wheels. This semi-automatic model was created as a completion of the automatic version Teco58A currently in production, and is characterized by the same solidity, reliability and versatility of use.

In the new version, the tools lifting and rotation are mechanically operated by solid and robust hooking and unhooking devices, having an ergonomic design and which are operated manually.

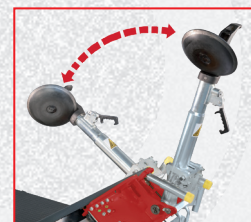

14" - 58" clamping
2 speed rotation with self-braking electric motor

Manual tool rotation

Manual tool lifting

Control unit with radio kit available on request

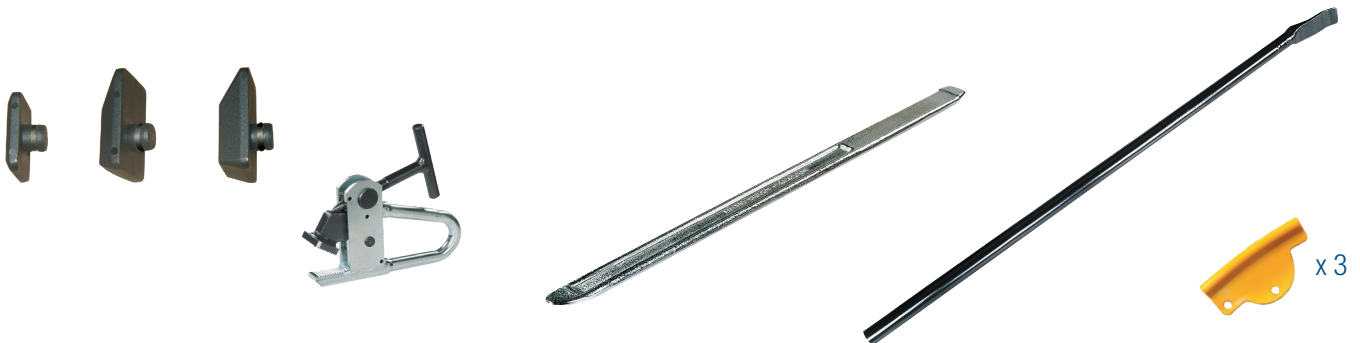

Standby automatico! Automatic standby!

MAIN FEATURES:

- **Clamping capacity 14" ÷ 58"** for clamping rims of trucks, busses, tractors and earth moving machines
- **2-speed chuck rotation** to reduce bead breaking times
- **Self-braking chuck motor** to ensure maximum precision during the most delicate working phases
- **Synchronized chuck and tool-holder** carries movement to have the tire always in an optimal working position
- **2-speed translational** movement to sensibly reduce operator working time
- **30.000N bead breaking force**, useful on the most critical tires
- **The tools rotation is manually** operated by a solid and ergonomic lever with automatic hooking
- **The tools lifting and lowering are manually operated**, with automatic hooking and solid fixing to the tool carriage
- **Pre-fitted for wireless remote control** thanks to a practical radio kit that can be installed on the machine on request, also compatible with Teco55
- **Power unit Stand-By** function for energy saving
