

SUBJECT: New TOUCHSCREEN version

We are glad to inform you that the range of **TECO** wheel balancers has been extended with the new **TOUCHSCREEN** version of the model **TECO 680 PLUS**, available for sale starting from October 2022.

WHEEL BALANCER FOR TYRE SPECIALISTS, DEALERS AND WORKSHOPS WITH MEDIUM-HIGH TYRE SERVICE VOLUME

TECO 680 PLUS features an industrial, resistive, 22" **TOUCHSCREEN** resisting to dust, dirty or wet hands, and suitable for use with gloves of any material. It is faster and more intuitive than the version with traditional monitor.

MAIN FEATURES:

- **Manual** or **automatic wheel clamping** with **PNEULOCK** (TECO 680 PL) device reducing working time and increasing the centring precision
- **Quick** and **user-friendly graphical user interface**
- **INTERNAL AUTO-SELECTING DIGITAL GAUGE** for the semi-automatic entry of distance and rim diameter with automatic selection of balancing programs
- **KIT TS sonar sensor** for the automatic wheel width measurement without contact (optional)
- **OneTouch** multifunction button to speed up selection in the various utility programs
- **Laser Pointer** at 6 o'clock for a quick positioning of adhesive counterweights
- **LED illuminator** to make rim cleaning and counterweight application easier
- **Weight Right** suite of programmes to save 30% in balancing counterweights, reduce balancing times, reduce rim-to-tyre matching operations and monitor the quantity of counterweights saved
- **RPA** automatic system which brings the wheel to balancing position at the end of the cycle and keeps it braked to permit application of adhesive and clip counterweights
- **Imbalance optimisation**
- **1 integrated LAN port**
- **2 integrated USB ports**
- **SONAR RUNOUT KIT** for the diagnosis of wheel run-out that causes vibrations that cannot be fixed with a simple wheel balancing (optional)
- **A4 printer** (optional)

For a correct management and an easier identification of the products when ordering, please refer to following machines codes:
